## ABOUT ME

Getting into software development has been an amazing journey. Since developing my very first project, I knew this was the career path for me and I was eager to learn more. Software development comes with many challenges and new opportunities to learn which specifically interests me.

## SKILLS

**HTML | CSS | JAVASCRIPT | JQUERY**

**REACTJS | ANGULAR | NODEJS**

**MYSQL | NOSQL | ADOBE XD |**

**MICROSOFT STUDIO | MVC |AGILE**

**VISUAL STUDIO | GIT | GITBASH |**

**POWERSHELL | NODEJS | C#**

## EDUCATION

### Web Development

*University of Denver*
March 2019- August 2019

## EXPERIENCE

### Software Engineering Internship

*The ReedGroup / Westminster CO / January 2020*

Software design, coding and debugging. Daily opportunities to gain exciting real-world software engineering experience. We frequently work in small teams to solve problems, explore new technologies, and learn from one another.

- Document and test new software applications
- Assess new application ideas
- Research competitor offerings
- Develop applications (coding, programming)

### Student Project

*University of Denver*

MyRealtor app is a group project app built with ReactJS and multiple API's such as AuthO, and Lockatron. This app helps make the house viewing experience much easier.

- view available homes in your area.
- Schedule house tours.
- Unlock houses with just a touch of a button.

### Student Project

*University of Denver*

Rock Paper Scissors game built with basic HTML, CSS, and JavaScript. Play against a computer and see if you can beat the odds!

- Game of chance.
- Shows keys fundamental skills of JavaScript.
